Class Fee:

**Advance registration suggested
by February 27, 2010**

\$130.00 per person

**Seating is limited to the
first 30 paid persons**

This class will cover how to make keys to most domestic and foreign automobiles without the use of key codes. Topics covered will include EZ Readers, Determinators and other tools that do not require disassembly of a lock.

The major learning objective is to be able to determine and use the quickest and easiest way to generate a working key to automobiles without key codes.

There will be hands-on use of some of the key generation tools used in the class.

If you have any of these tools, please bring them for the class.

This class has been approved for continuing education credit for your locksmith license renewal.
