Date: March 28, 2010

Time: 8:00 am—5:00 pm

Location: Holiday Inn
201 Crossings Blvd
Antioch, TN 37013

Special room rate of \$79.00/night

Call 615-731-2361 for reservations

Class Fee:

**Advance registration suggested
by February 27, 2010**

\$130.00 per person

**Seating is limited to the
first 30 paid persons**

This class will cover what an automotive transponder is and how it works. The student will learn what chip swapping is and how it can save you money. Programming equipment, cloning and remote keyless entry fobs will also be covered.

The major learning objective is to be able to determine the correct transponder key for the application is and how to program the key to the car. What keys can be cloned and how to program the remote keyless entry fobs.

There will be hands on programming of some cars with the equipment shown in the class.

This class has been approved for continuing education credit for your locksmith license renewal.
